Francisco Benedict

Front End Web Developer Specialist
HTML5 • CSS3 • JavaScript

CAREER SUMMARY

Dec 2016 – Jan 2017 Kids Industries: The Family Agency

Position: Front End Developer

Project: Baraem TV

Description: Headquartered in Qatar and managed by Al Jazeera Children's Channel, this is a pre-school Arabic television channel that caters for children between the ages of 3 and 6 years old, presenting television programs specifically tailored for this age-group.

The Baraem TV website is aimed at both Arabic speaking and English speaking audiences so it serves both LTR and RTL text, with content for both adult and children alike including expert advice for parents and TV programs & games for children.

Website: www.baraem.tv

Technologies used:

HTML5

CSS3

SASS

PUG

Node JS

Webpack

Angular JS

JavaScript

Responsibilities:

- Worked in an Agile environment with one weekly sprints and twice daily stand-up SCRUM (once in the morning and once again in the afternoon) giving account of the previous day's achievements and the current day's achievements respectively.
- Intense development strategy with many moving parts and constant change requests making for a thoroughly enjoyable project which I am extremely proud to have been a part of.
- Built a number of features alongside very talented developers.
- The entire Baraem TV website was built to "l10n" and "i18n" standards serving both left-to-right and right-to-left text.

Oct 2016 – Nov 2016 Department for International Trade

Position: Front End Developer

Project: Find a Buyer

Description: A government initiated project to create an online portal to help promote UK businesses in the global export market to allow exposure. The website is designed to allow international buyers to find UK sellers and to help UK businesses find buyers internationally.

My involvement was specifically to develop the user interface paying close attention to GDS (Government Digital Services) and following industry standard recommended accessibility best practices.

Francisco Benedict

Front End Web Developer Specialist

HTML5 • CSS3 • JavaScript

Website: www.find-a-buyer.export.great.gov.uk
www.exportingisgreat.gov.uk

Technologies used:

HTML5

CSS3

Bootstrap

SASS

Django

Docker

Responsibilities:

- Worked in an AGILE environment with one week sprints.
- Daily Scrum stand-up meetings.
- Building template HTMLs and styling pages using SASS.
- Worked to the GDS (Government Digital Services) specifications.
- Ensured best practices were followed with regards to Accessibility.
- Worked very closely with designers and user experience (UX) team members.
- Developed repetitive pages using high fidelity wire frames whilst following the design guidelines.
- Engaged with members from other teams in other Digital department for the purposes of code reuse to prevent inconsistencies.

Sept 2016 – Oct 2016 PricewaterhouseCoopers

Position: JavaScript Developer

Project: Internal PwC VAT audit application used internationally to keep track of past and on-going cases.

Description: The VAT audit application is used to search past and on-going cases for the outcomes allowing users to cross-reference linked cases and view details of cases.

Technologies used:

JavaScript

Angular JS

jQuery

Node JS

Gulp

JSON

HTML5

Bootstrap

CSS3

SASS

Responsibilities:

- Key responsibility was to rebuild an existing application used to cross reference data related to sensitive cases and extend the application to query two other data sources to perform further searches to simplify cross-referencing whilst performing a search. Furthermore, the drilled down details view of the search results was greatly improved.
- Ensured best practices were followed with regards to Accessibility.
- Worked in an AGILE environment.
- Worked very closely with stakeholders to ensure the requirements of the application were met and worked to the PwC internal style guides.

Francisco Benedict

Front End Web Developer Specialist

HTML5 • CSS3 • JavaScript

June 2015 – Aug 2016 Macat International

Position: Senior Front End Web Developer

Project: Macat Web Portal
Macat Library website
Critical Thinking Measurement Tool

Description: E-Learning start-up helping learners everywhere develop the two most important skills workers will need by the year 2020; critical thinking and problem-solving.

Website: www.makat.com
library.makat.com

Technologies used:

HTML5	CSS3	Angular JS	React JS	JSON
LESS	jQuery	JavaScript	Handlebars	Gulp
Node JS	Visual Studio 2015	TFS	D3	Chart JS

- Responsibilities:
- Worked in an Agile environment with typically two weekly sprints and conducted daily stand-ups in SCRUM giving account of the previous day's achievements and the current day's tasks for completion listing any impediments and escalating as necessary.
 - Built new features for the Macat platform.
 - Rebuilt existing features to improved specifications.
 - Built the web interface of the Critical Thinking tool for a collaboration study between Macat and the University of Cambridge using aspects of Qualtrics.
 - Worked closely with back end developers to help deliver automatically generated PDF reports detailing results pulled from a database after users had taken the Critical Thinking Test. This was done with PhantomJS. Charts were created with ChartJs and D3.
 - Built a series of Word Press pages purely for marketing purposes; used mainly for the promotion of aspects of the business as when required.
-

May 2014 – May 2015 Accenture

End client: Discovery Network International (DNI)

Position: Web Developer Specialist

Project: Developing a series of Discovery Channel websites including BAU services management support.

Description: The development and redevelopment (including service management of existing sites) of a number websites owned by The Discovery Channel to bring them in line with modern technology.

Francisco Benedict

Front End Web Developer Specialist

HTML5 • CSS3 • JavaScript

Sites include Discovery — LatAm (Latin American), Discovery Kids — LatAm Kids (Latin American), TLC, Home & Health, DMAX, Dplay and Eurosport.

This project involved a level of internationalisation and localisation in varying degrees.

Website: www.latam.discovery.com
www.tudiscoverykids.com
www.latam.discoverymujer.com
www.dplay.no
www.uk.tlc.com

Technologies used:

HTML5

CSS3

Wordpress

PHP

Angular JS

Putty

JSON

SASS

jQuery

JavaScript

Handlebars

Grunt

Node JS

Vagrant

Responsibilities:

- Worked in an Agile environment with typically two weekly sprints and conducted daily stand-ups giving account of the previous day's achievements and the current day's tasks for completion.
- Used Atlassian Confluence and Jira to communicate issues with stories and the states of tasks and stories within a given sprint and to keep note of documentation of work.
- Built Wordpress modules with reusable and extensible code for new Discovery owned websites using mainly HTML, CSS/SASS, JavaScript/jQuery, PHP and above technologies mentioned where necessary.
- Responsible for maintaining, making change requests and bug fixing for Discovery owned legacy websites.
- Git, Gitbash within a Vagrant environment to create branches, merging, resolve conflicts and share repositories.
- Used Sublime Text 3 as the editor for all programming languages and Grunt to for compilation.

Nov 2012 – Mar 2014 **Chillisaucе**

Position: Front End Web Developer

Project: Chillisaucе website
Chillisaucе Members Area

Description: The development of the Chillisaucе website and improvement to the Chillisaucе Members Area accessible to event goers for stag and hen events.

My role whilst at Chillisaucе was two-fold; primarily development of the

Francisco Benedict

Front End Web Developer Specialist

HTML5 • CSS3 • JavaScript

website and secondarily, information architecture for the Chillisauce website.

Website:

www.chillisauce.co.uk

Technologies used:

HTML5

CSS3

JSON

jQuery

JavaScript

Handlebars

Underscore JS

Bootstrap

SVN

Razor

Responsibilities:

- Developed a working prototype of the wireframe using the Bootstrap framework with dummy data from the template system of UnderscoreJS with as much functionality as possible so as to meet requirements.
 - Developed a dynamic and responsive mobile-ready website using the Bootstrap framework with real data pulled from the database.
 - Identified key requirements; project's aims, objectives, scope and deliverables.
 - Drew user flow journey.
 - Compartmentalised sections of the website into modules for re-usability.
 - Drew low fidelity wireframes.
 - Worked in a typically Agile environment with two weekly sprints and conducted morning stand-ups giving account of the previous day's achievements and the current day's tasks for completion.
 - Used Atlassian Confluence to document the state of the website and Jira to communicate issues with stories.
-

Sept 2012 – Oct 2012 Options

Position:

Design & Web Developer

Project:

Options website
Options corporate brand

Description:

Options connects like-minded professionals; helping people optimise their concepts and ideas by organising professional and social events to facilitate these connections.

I created the branding and developed the website for the owners of Options.

Website:

www.uptions.com

Technologies used:

HTML4 / XHTML

CSS2 / CSS3

jQuery

JavaScript

PHP

Adobe Illustrator

Adobe Photoshop

Adobe InDesign

Francisco Benedict

Front End Web Developer Specialist

HTML5 • CSS3 • JavaScript

Responsibilities:

- Design: Designed and created the Options logo; Design the look and feel (including colour scheme and signature pattern) for the website based on the Options logo.
- Information Architecture: Created Userflow diagrams, low-fidelity design, wireframes and high-fidelity design which were approved by the client.
- Development: Developed a mobile device-ready interface for Options; employed the use of jQuery libraries throughout the website; used media queries for varying screen dimensions; PHP includes for code re-use; PayPal integration to allow users to book Options events via the website.
- Carried out testing on the entire site to find design, coding and development flaws - cross browser testing; also carried out device testing for screen dimensions (iPad, iPhone, Android HTC, desktop and notebook devices).

Aug 2012 – Oct 2012

Zero Degrees West

Formerly:

Market ME

End client:

Universal
Amazon

Position:

Front End Web & Flash Developer

Description:

Zero Degrees West is a marketing and advertising agency creating promotional digital material for blockbuster movies, television programmes and the like.

I developed online flash banners, flash games, Facebook pages and microsites.

Technologies used:

Flash

Action Script 3

Action Script 2

HTML4 / XHTML

CSS2 / CSS3

jQuery

JavaScript

Adobe Photoshop

Adobe InDesign

Responsibilities:

- Developed Ted (Seth McFarlane) asset entry into a digital touch-screen "6 Sheet" for showcasing to DCM using Flash AS3.
- Ted (Seth McFarlane) game for social networks (Facebook) using Flash AS3.
- Aurasma stickers: Augmented Reality Design (Photoshop, InDesign).
- Facebook Tab – Flash interface created for The Monster Collection presented by Universal 100.
- Zero Degrees West website UI Design.

Francisco Benedict

Front End Web Developer Specialist

HTML5 • CSS3 • JavaScript

Jun 2010 – July 2012

BHD Creative

Formerly:

RMA Design

End client:

Symantec
Roemheld UK
Fira
Sandwell Council
Waterside Aesthetics
Lichfield Garrick
and others

Position:

Front End Web & Flash Developer

Description:

BHD Creative is a Design Agency working with clients throughout the UK, EMEA and the US delivering great branding and clear communication tools.

I developed websites and microsites for BHD Creative's clients along with online flash banners and flash games.

Website:

www.bhdcreative.co.uk

Technologies used:

Flash

Action Script 3

Action Script 2

PHP

HTML4 / XHTML

CSS2 / CSS3

jQuery

JavaScript

Adobe Photoshop

Adobe Illustrator

Adobe InDesign

Responsibilities:

- Developed and maintained website for Waterside Aesthetics making improvements where possible on discovery of emerging methodologies or web technologies.
- Developed website for Fira.
- Developed four public consultation websites for Pegasus Planning Group.
- Design and development of Flash games for online (Symantec) and standalone (BHD Creative) usage. The Symantec games were localised into six different languages.
- Development of Flash animation sequences for the Sandwell Council website.
- Development of several web banners for Symantec which were localised into 10+ languages.
- Front-end development of several microsites by creating clean and maintainable code from PSD using PHP, X/HTML, CSS2/3, JavaScript, JQuery/Ajax.
- Maintaining and updating - creating new X/HTML pages or updating existing sites and adding new functionality using CSS and jQuery.
- Ensure that developed sites are cross browser compatible.

Francisco Benedict

Front End Web Developer Specialist

HTML5 • CSS3 • JavaScript

- Designed websites so that they are optimised for search engines (SEO best practices followed).
- Designed websites to W3C standards, checked and code-cleaned before deployment.
- Designing, coding and dispatching of HTML emailers.
- Graphic Design of HTML Banners, Posters, touching-up of images for web use and brochures.
- Worked closely with, and incorporated feedback from, visual designers, developers and product managers.
